Gibson Teldata Introduces Gibson Cumulus VoIP Solutions

Virtual PBX with all the features a business needs to thrive

Indianapolis, Ind. — September 1, 2020 — Gibson Teldata, Inc., today announced two new feature-rich, VoIP-based, private cloud offerings tailored to businesses of any size. ***Gibson Cumulus Essentials*** is the perfect solution for offices wanting a basic, easy to use phone system. ***Gibson Cumulus Enterprise*** is ideal for organizations who need a full featured communications system, including UC, mobile apps and web conferencing.

“Gibson Teldata helps businesses take advantage of the latest communication technologies. Regardless of size, cloud hosted phone systems offer businesses all the benefits of traditional enterprise phone systems, for one all-inclusive monthly charge, including maintenance” said company President Brett Gibson.

“A Gibson account executive works with you to fully explain ‘the cloud,’ hosted phone systems, and how your business can increase efficiency and save money with these tools. As your business scales, so will your phone system,” said Gibson.

Cloud solutions allow a business to eliminate monthly telephone line charges, remove bulky on-site equipment, and do away with maintenance and support fees. The Cumulus Enterprise phone system is all-inclusive, with one simplified bill per month covering local, long distance, and all telephone system related charges.

Gibson Cumulus Platforms allow Gibson Teldata to customize solutions to meet the needs of the business. A few available features include:

- Hosted PBX with advanced features (i.e. Call Recording, Desktop Sharing, Instant Messaging, Presence, Unified Messaging, etc.)
- Mobility solution (with apps for Android and iOS)
- Audio/Web Conferencing and Meetings
- Auto-Provision most SIP Phones (including Polycom, Yealink, Grandstream)
- App Integrations (Salesforce, WordPress and more)
- Web Fax Solution
- True Unified Communications as a Service (UCaaS)
- 99.99% Uptime SLA with Geo-Redundancy
- QoS Monitoring and Alarms

Based on customer needs, Gibson Teldata will determine if Cumulus Essentials or Enterprise is the best fit.

“Our team has professional experience and a deep understanding of the latest cloud-based technologies used in today’s small business and enterprises, including public, private and hybrid cloud solutions,” said Gibson. “Our goal for the *Gibson Cumulus* offering is to create the optimal cloud environment, built to fit the unique needs of our customers.”
