

The Chamber's Franklin Initiative

STEM & Life Sciences Career Fair

The Life Sciences Career Fair introduces high school students to education and career opportunities in the life sciences. Students meet with representatives from about 20 local life science employers, including Cook, Baxter BioPharma Solutions, Boston Scientific, Singota Solutions, and IU Health Bloomington, as well as pharmacists, optometrists, a forensic detective, and IU researchers. Science teachers at all area high schools, public and private, will be invited to bring their students to the event.

Employment & Job Skills Fair

The Employment Skills Fair links graduating seniors with the information they need to make decisions about future careers and employment. Students from Monroe and surrounding counties meet with local employers, including life sciences, manufacturing, banks, retail, parks, nonprofits, apprenticeship programs, as well as Ivy Tech and WorkOne.

Success Sponsor ~ \$1000
